Wins

- All new students (70%) who has never traded before has a great understanding around Nasdaq; what it is; when to trade and when not to trade
- 90% of students who had gone through the Mr Nasdaq academy exclusive strategy are able to use it effectively along with trading independently.
- 90% of students coming on board had increased their level of discipline within the Nasdaq market
- The Mr Nasdaq Calibration group remains interactive and engaging, especially live trading daily (15:30)
- 90% of students had made their signup monies back
- Adhoc support; WhatsApp messages and phone calls

Challenges

- 10% of student who had gone through the strategy are not waiting for 15:30 to trade.
- 10% of students are still implementing FOMO and end up taking more trades than normal.
- We still have students being hopeful and over risking their account to make quick money.
- Students are still not waiting for retest and then execute trade
- 10% of students are not taking their profit at TP1

Solutions

10% of student who had gone through the strategy are not waiting for 15:30 to trade.

➤ **Mr Nasdaq reiterating and reminding students in the signal group**

10% of students are still implementing FOMO and end up taking more trades than normal.

➤ **In lessons; recap negative impacts thereof**

We still have students being hopeful and over risking their account to make quick money.

➤ **Mr Nasdaq is unable to control this for the student or trader**

Overall

June month had been a great month for us; profit gain vs loss gain is a huge gap. Which clearly indicates an extreme profitable month. Mr Nasdaq Academy continues to provide this level of service for the new month of July.

We commit impacting more people and families. We guarantee understanding at the end of the 30 days 😊 thus far all former students can trade by themselves which displays the capabilities of Mr Nasdaq Academy

Again I thank you for your support 😊
